Darren Jensen

LLM Engineer | Blockchain Engineer | Security Researcher

Phnom Penh, Cambodia | darren.jensen@gmail.com | LinkedIn

SUMMARY

I am an LLM Engineer, Blockchain Engineer and Security Researcher with over 20 years of experience across DeFi, Web3, and FinTech, now applying that domain depth to AI engineering. I hold an MSc in Computer Science from The University of Manchester alongside a Blockchain Developer Nanodegree and an AI / Machine Learning Nanodegree from Udacity.

I am building an agentic DeFi yield platform - a multi-agent system where a Portfolio AI Agent reasons over a user's on-chain positions and a Researcher AI Agent continuously embeds DeFi news + exploit reports into a vector index for semantic retrieval.

I have also held senior leadership roles including CTO at a FinTech startup in SE Asia. I am now focused on AI Engineering roles where deep blockchain and security context is a force multiplier - building agents, retrieval systems, and LLM-powered tooling for DeFi, security, and on-chain intelligence.

SKILLS

- AI Agents
- MCP
- AWS SageMaker
- Blockchain Technology
- AI
- RAG
- AWS Bedrock
- DeFi
- LLM
- Hugging Face
- Smart Contracts
- Security Research

EDUCATION

MSc, Computer Science (1999 - 2000)
The University of Manchester (*Issued Sept 2000*)

CERTIFICATIONS

AI Engineer Production Track: Deploy LLMs & Agents at Scale
Udemy Credential ID (*Issued April 2026*) UC-e9d8f9e8-5ecf-43b2-8047-6518190fc077

AI Engineer Agentic Track: The Complete Agent & MCP Course
Udemy Credential ID (*Issued Apr 2026*) UC-ef1b5063-2bde-42e7-be49-d15311ce1b34

AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents
Udemy Credential ID (*Issued Apr 2026*) UC-3907ce29-6ef8-4c62-b25e-143723ed0121

AI for Trading
Udacity Nanodegree Credential ID (*Issued Sep 2021*) ASEYVUKW

Blockchain Developer
Udacity Nanodegree Credential ID (*Issued Jun 2020*) DF9GMGUP

EXPERIENCE

Quantstamp, Inc. — Smart Contract Security Researcher
September 2024 - April 2026 (1 year 8 months)

During my time at Quantstamp, I completed over 50 audits across Solidity and Rust-based protocols, acting as lead auditor on approximately half of all engagements. The protocols spanned a broad range of DeFi verticals including Oracles, Perpetuals, RWA, Bridges, Vaults, and Wallets. Notable clients include API3, Blockdaemon, PancakeSwap, RFX Exchange, SoDex, OnRe, Exceed Finance, Camp, Hipo Finance, and Crouton Finance, among others.

Oak Security — Smart Contract Security Researcher

January 2024 - September 2024 (9 months)

As a Smart Contract Security Researcher at Oak Security, I focused on auditing and enhancing the security of smart contracts. My role involved collaborating with innovative protocols like Mars V2 and Size Lending, ensuring robust security measures were in place. I utilized my expertise in Solidity, Yul, and Rust (CosmWasm) to identify vulnerabilities and improve overall contract integrity.

Alethea AI — Smart Contract Security Researcher

July 2023 - September 2024 (1 year 3 months)

At Alethea AI, I specialized in auditing smart contracts, ensuring the security and efficiency of the protocol. My role involved evaluating ERC20 tokens, NFT tokens, and LayerZero bridging integrations across multiple EVM chains, including Ethereum and Polygon. I contributed to the integrity of the AletheaAI protocol by focusing on critical integrations and security measures.

DWF Labs — Smart Contract Security Researcher & Developer

February 2023 - October 2023 (9 months)

At DWF Labs, I contributed as a Smart Contract Security Researcher & Developer, focusing on integrating QuickPerps Solidity contracts into a web sockets feed, enabling real-time order book generation for an AMM trading platform. This role allowed me to deepen my expertise in smart contract development and security.

Point Network — Smart Contract Developer (Solidity) & Blockchain Architect

January 2021 - December 2022 (2 years)

As a Smart Contract Developer and Blockchain Architect at Point Network, I focused on building a decentralized internet through a blockchain-based peer-to-peer network. My role involved developing backend nodes and creating a suite of decentralized applications to showcase innovative solutions in social networking, email, and content sharing.

Ze.Fi — Smart Contract Security Researcher & Developer

September 2020 - December 2022 (2 years 4 months) — Berlin, Germany

In my role at Ze.Fi, I contributed as a Smart Contract Security Researcher and Developer, focusing on blockchain technology and full-stack engineering. I developed trading platforms and performed security audits on smart contracts, ensuring the integrity of the Ze.Fi platform. Additionally, I prototyped layer 2 solutions and provided strategic advice on NFT integration for Ze.Academy, enhancing their offerings in the blockchain space.

Clik — Chief Technology Officer (Fintech Mobile Payments & KYC Blockchain)

January 2018 - July 2020 (2 years 7 months) — Cambodia

At Clik, I played a pivotal role in shaping the technology landscape for our fintech mobile payments and KYC blockchain solutions. I was instrumental in building the technology department from the ground up, recruiting talented developers, and integrating with banking partners. My efforts included designing a prototype for an Ethereum blockchain layer, which enhanced transaction security and accountability.

TigerBee — Blockchain Developer (Telegram TON, Node JS, Vue JS)

September 2019 - February 2020 (6 months) — Remote

Helped to deploy and set up a fork of the Telegram TON Blockchain for a private group of investors. Worked on building WebAssembly extensions to a client Vue JS application. Connected a custom Telegram bot to a chat based client for interacting with the private fork of the TON Blockchain.

Paxful — Bitcoin Exchange API Developer

April 2019 - February 2020 (11 months) — Remote

Designed and built a RESTful API in using Python Flask-RESTful API to interact with an existing Bitcoin exchange system in order to process trades for Bitcoin traders to facilitate an international cash remittance service.

Rotati — Founder and CEO

January 2015 - January 2020 (5 years 1 month) — Phnom Penh, Cambodia

Rotati was a software consultancy firm that I founded which is mainly focusing on Ruby on Rails and Javascript (React Js / Vue JS) projects. Rotati also developed a number of projects using the AWS Serverless platform.

Golden Gate Ventures — Rails Developer

June 2016 - September 2016 (4 months) — Remote

Worked on a smart RSVP system for inviting and managing VIP's to attend various shows, presentations and parties in and around Singapore.

Trail — Rails / React JS Developer

March 2015 - July 2015 (5 months) — Remote

Contractor for Trail App for a few months to help create new React JS components, manage Rails backend processes to provide data to the components and keep RSpec tests updated and in order.

Sanelabs — Rails Developer

February 2014 - December 2014 (11 months)

Rails developer responsible for writing fully tested features for custom enterprise solutions for Internet Service Providers worldwide building everything from the front end to integration with network backend solutions and billing systems. Technologies used: Rails 4.1, RSpec, jQuery, CoffeeScript and Sigma.js (for ISP network visualisations).

coLAB Cambodia — Co-Founder

January 2012 - December 2014 (3 years) — Phnom Penh

coLAB is a non-profit co-working space in Toul Tom Pong (near Russian Market) run and managed by its very members! We provide a comfortable, safe working environment with fast internet and good company. Our motto: "Work solo but not alone".

Cambodia Startup Weekend — Founder and Organizer for Cambodia and SEA Facilitator

April 2011 - December 2014 (3 years 9 months) — South East Asia

I introduced Startup Weekend to Cambodia with the first event held in September 2011, second event in June 2012 and our third in November 2013. I am also a facilitator for Startup Weekend events in South East Asia and attended events in Singapore, Manila and Bangkok. I also attended the 2012 Startup Weekend Global Organizers Summit in Austin, Texas.

Hackerspace Phnom Penh — Co-Founder

December 2010 - December 2014 (4 years 1 month) — Phnom Penh

Part of a team that founded Hackerspace Phnom Penh - a non-profit technology club! We have an arduino kit, Microsoft kinect and other hacking tools in addition to training sessions, movie nights, social events and more.

MangoMap — Rails Developer

February 2010 - December 2014 (4 years 11 months)

Rails Developer working on billing systems (using Recurly), backup systems (written in Ruby) and a custom spreadsheet geocoding gem.

Yoolk — Co-Founder, CTO and Rails Developer

February 2004 - February 2014 (10 years 1 month) — Phnom Penh

Yoolk is a business that provides online, mobile and database to print publishing solutions for the Yellow Pages / Business Directory industry. Operators anywhere in the world can use Yoolk to manage sales, build relations with their customers and sell online advertising and SME tools all built on the Yoolk platform. Yoolk also integrates with a number of other data providers like Google, Facebook and Twitter. Yoolk even provides an easy online publication tool to serve each SME's listing data via their own website customized specifically for SME's using via their own domain.

Solano Labs — Rails and Backbone.js Developer

July 2012 - December 2012 (6 months) — San Francisco

Ruby on Rails developer for Solano Labs CI Server product Tddium. Responsible for writing full tested features for the Tddium site and application using Ruby on Rails, RSpec and Cucumber as well as some client side development using Backbone.js.

Limkokwing University of Creative Technology — Lecturer

September 2011 - December 2011 (4 months) — Phnom Penh

I taught Management Information Systems (MIS) and Interaction Design for Mobile Applications using HTML5 at the Phnom Penh campus of the prestigious Limkokwing University.

CIBC World Markets — .NET Developer

June 2007 - June 2008 (1 year 1 month) — City of London

.NET Developer for Client based Credit Derivatives system for CIBC World Markets in the City of London.

Interquess Enterprises — Microsoft Developer

2002 - 2004 (2 years) — Global

Produced various software products using VBA, ASP and Javascript.

Halogen Enterprises Ltd — Java Developer

January 2001 - July 2001 (7 months)

Java Developer for an automated insurance quotation system for AIG.

Oven Digital — Java Developer

September 2000 - December 2000 (4 months)

Research and development using EJB.
